第七届国际硬皮病联盟 InSCAR 年会

The 7th Symposium of International Network of Scleroderma Clinical Care and Research (InSCAR)

Registration: 8:00-8:30 Venue: Administration building, Huashan Hospital (North), 108 Luxiang Road, Shanghai

Time	Topic	Speaker	Moderator
08:30~08:45 Opening Ceremony	Welcoming Remarks: Prof. Li JIN, Vice President of Fudan Univ. Address by President of InSCAR: Prof. Maureen MAYES		Prof. Hejian Zou
08:45~09:15	Towards precision medicine in China	Prof. Li Jin	Prof. John Reveille
09:15~10:00	Therapeutic targeting of fibrosis in systemic sclerosis	Prof. Maria Trojanowska	
10:00~10:15	Coffee Break		
10:15~10:55	Stratified medicine and scleroderma: emerging biomarkers and sub-phenotypes	Prof. Christopher P. Denton	Prof. Maureen D. Mayes Prof. Wenyu Wu
10:55~11:35	Interstitial lung disease in systemic sclerosis	Prof. Eun Bong Lee	
11:35~12:05	Genetic factors of systemic sclerosis	Prof. Xiaodong Zhou	
12:05~13:30	Lunch		
13:30~14:00	Current treatment options in SSc	Prof. Maureen D. Mayes	Prof. Christopher P. Denton Prof. Xiaodong Zhou
14:00~14:20	Quantitative alteration of IgG galactosylation in Chinese systemic sclerosis patients	Prof. Jiucun Wang	
14:20~14:40	Clinical association of CXCL1 with interstitial pneumonia with autoimmune features (IPAF)	Dr. Minrui Liang	
14:40~14:55	Scleroderma mimics	Zhixing Jiang	
14:55~15:10	Association between anti-centromere antibody and clinical features in Chinese SSc patients	Xiangxiang Chen	
15:10~15:30	Coffee Break		
15:30~15:45	Increased expression of latent TGF- β binding protein-4 affects the fibrotic process in Scleroderma	Jiaying Lu	Prof. Eun Bong Lee Prof. Jiucun Wang
15:45~16:00	Therapeutic effects and molecular mechanism of the Qingfeizhike compound in mouse model of lung fibrosis	Lei Wang	
16:00~16:15	Increased TET1 induces hyper-hydroxylation and overexpression of CD40L and CD70 in CD4 ⁺ T cells in systemic sclerosis	Zhuotong Zeng	
16:15~16:20	Closing Remarks	Prof. Hejian Zou
